EDUCATION

Stony Brook University

Incoming M.S. Computer Science Student - Fall 2026

Long Island, NY

September 2026

Case Western Reserve University

B.S. Computer Science | Minors: Mathematics & Art Studio

Cleveland, OH

August 2021 – May 2025

TECHNICAL SKILLS

Product & UX: User Research, Wireframing, Prototyping, A/B Thinking, Information Architecture

Technical: Python, TypeScript, Java, C#, React, Angular, Flask, HTML/CSS

Data & Systems: SQL, MongoDB, API Design, Data Pipelines

Tools: Figma, Git, Agile (Scrum/Kanban), Jira, GitHub Actions

WORK EXPERIENCE

Noya Ventures

Software Engineer - Contract

Remote, California

October 2025 – Present

- Designed and maintained backend data architecture using Python, Flask, and SQL, including database schema design and secure data pipelines supporting production APIs
- Built and iterated RESTful APIs and backend services using Flask to support scalable data processing and platform functionality.
- Collaborated on defining system requirements and translating product needs into technical solutions.

Millennium Information Solution Ltd.

Frontend Developer - Intern

Remote, Bangladesh

July 2025 – October 2025

- Led development of user-facing dashboards and authentication flows for a banking platform using Angular and TypeScript.
- Translated business and user requirements into responsive UI features across the full product lifecycle.

Federal Reserve Bank of Cleveland

Software Engineer - Intern

Cleveland, OH

June 2024 – November 2024

- Improved usability of internal tools by 50% through redesigning UI components and optimizing interaction flows.
- Partnered with cross-functional teams to identify user pain points and implement high-impact feature improvements.
- Contributed to sprint planning and delivery, aligning engineering work with product priorities.

SPiDLab, Case Western Reserve University

Backend Developer | PI: Professor Erman Ayday

Cleveland, OH

May 2023 – May 2024

- Built backend services for a secure genomics research platform using Flask and MongoDB, supporting regulated research workflows and secure data handling.
- Led weekly team syncs and coordinated Kanban boards to track progress and deliverables.

PROJECTS

Maisoon's Portfolio | React, Vite, JavaScript, HTML5, CSS, Tailwind, YAML, GitHub Actions

Built and deployed a responsive web application demonstrating frontend engineering, UI/UX design, and automated deployment pipelines.

Biological Clock Ensemble using Kalman Filtering | Python

Built biometric data pipelines and applied Kalman Filtering to model circadian rhythms.

Melody Mapper | Python, HPC, NLP, Spotify API

Developed an NLP model to analyze song lyrics and deployed it on a high-performance cluster for large-scale theme prediction.

Nap Quest | Unity, C#, Procreate

Published Unity game, serving as product manager and developer, writing test cases and incorporating playtesting feedback to improve user experience and engagement.

LEADERSHIP & ACTIVITIES

Systems Bangladesh, Co-Lead, Editor of NewsLetter

Organize community tech talks and other digital outreach to expand engagement for Bangladeshi women in technology.

January 2025 – Present

LUX CWRU's Yearbook, Director of PR

Directed branding and outreach strategy, designing campaigns using data-informed decisions to boost engagement.

August 2024 – July 2025

HackCWRU, Director of PR

Executed social strategy, marketing, sponsor outreach, and campaigns, significantly boosting hackathon participation and visibility.

January 2023 – May 2024
