EDUCATION

New York University (Tandon School of Engineering)

Incoming M.S. Student - Fall 2026

New York, NY

September 2026

Case Western Reserve University

B.S. Computer Science | Minors: Mathematics & Art Studio

Cleveland, OH

August 2021 – May 2025

Relevant Coursework: Data Privacy, Computer Security, High Performance Computing, Basic Linux Tools & Scripting

TECHNICAL SKILLS

Programming Languages & Frameworks: Python, R, TypeScript, Java, C#, Flask, Angular, React, .NET, Bash

Databases & Cloud: AWS, Amazon RDS, Docker, SQL Server, MongoDB, Relational & NoSQL Databases, Database

Administration, REST API Development

DevOps & Testing: Agile Scrum/Kanban, Test Driven Development, Unit and Integration Testing, Jira, Git Version Control, CI/CD with GitHub Actions and YAML

WORK EXPERIENCE

Noya Ventures

Software Engineer - Contract

Remote, California

October 2025 – Present

- Own backend data architecture using Python, Flask, and SQL, including database schema design and system-level data flows.
- Implement backend services and production APIs using Flask, translating evolving product requirements into scalable technical solutions.
- Develop and prepare Sandbox v1 using MySQL, with an initial release targeted for January 2026.

Millennium Information Solution Ltd.

Frontend Developer - Intern

Remote, Bangladesh

July 2025 – October 2025

- Led frontend development for a banking app using Angular and TypeScript, building dashboards, and authentication.
- Delivered features across the full SDLC, from requirements and UI design to testing and production in an agile environment.

Federal Reserve Bank of Cleveland

Software Engineer - Intern

Cleveland, OH

June 2024 – November 2024

- Optimized UI responsiveness for internal financial tools using .NET, Angular, TypeScript, HTML, and CSS, and streamlined deployments to AWS using Docker.
- Implemented basic CI/CD pipelines using YAML to automate deployments and promote a test-driven development (TDD) workflow.
- Managed tasks and sprints within Azure DevOps, collaborating in daily standups and sprint planning sessions to ensure on-time delivery.

SPiDLab, Case Western Reserve University

Backend Developer / PI: Professor Erman Ayday

Cleveland, OH

May 2023 – May 2024

- Designed and implemented the backend of a secure genomics research platform using Flask and MongoDB, integrating it with a React frontend, ensuring seamless API communication for an IRB compliant genomics website for researchers.
- Led weekly team syncs and coordinated Kanban boards to track progress and deliverables.

PROJECTS

Paw-Modoro Timer | React, Express, JavaScript, Amazon RDS

Designed AWS RDS schema, implemented backend logic with REST APIs, and integrated automated test cases to enhance functionality and user experience in a gamified productivity app.

Biological Clock Ensemble using Kalman Filtering | Python

Built biometric data pipelines and applied Kalman Filtering to model circadian rhythms.

Melody Mapper | Python, HPC, NLP

Developed an NLP model to analyze song lyrics and deployed it on a high-performance cluster for large-scale theme prediction.

Nap Quest | Unity, C#, Procreate

Published Unity game, serving as product manager and developer, writing test cases and incorporating playtesting feedback to improve user experience and engagement.

LEADERSHIP & ACTIVITIES

Systems Bangladesh, Co-Lead, Editor of NewsLetter

Organize community tech talks and other digital outreach to expand engagement for Bangladeshi women in technology.

January 2025 – Present

LUX CWRU's Yearbook, Director of PR

Led branding and outreach strategy, designing campaigns informed by engagement analytics.

August 2024 – July 2025

HackCWRU, Director of PR

Directed social strategy, marketing, sponsor outreach, and campaigns that boosted hackathon participation and visibility.

January 2023 – May 2024
